

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

INDIANAPOLIS, IND., Nov. 7, 1896.

OFFICE OF THE STATE LIBRARIAN, }  
INDIANAPOLIS, NOV. 6, 1896. }

*To the Honorable the General Assembly of Indiana:*

The State Library under the control of the State Library Board, has made decided advancement along its special lines. There has been added a very valuable collection to the different departments of reference, history, biography, political, social and economic science, and quite an addition to Indiana history and literature, besides completing a file of the early laws of the State. Among these books may be mentioned the following important volumes:

Standard Dictionary.

Johnson's Universal Encyclopedia.

Harper's Book of Facts.

Nicolay and Hay's History of Lincoln, 10 vols.

Spofford's Historic Characters, 10 vols.

Grosvenor's Constantinople, 2 vols.

Shaw's Municipal Government in Great Britain.

Shaw's Municipal Government in Continental Europe.

Gross' Guild Merchant, 2 vols.

Eidersheim's Life of Christ, 2 vols.

An entire set of the Century Magazine has been added to the Library, and when other sets are completed, especially the North American Review, the Library will contain a rich store, the annuals being readily referred to through Poole's Index. The purchase of some very early laws of the State of Indiana and the binding of 100 volumes of State Papers consumed a very large part of the annual appropriation.

There have been added to the Library since the last report, 1,533 volumes and 520 pamphlets. The number of volumes bound in the past two years is—

Half Russia .....	2
Half Morocco.....	240
Law.....	12
Rebound in the Library.....	75
Number of newspaper readers in Reading Room	7,352
Number of volumes used in Reading Room.....	6,954

The Academy of Science has deposited its report for 1895 and 1896 in the Library. It is the hope of the Librarian to be able to purchase a complete set of the Proceedings of the Academy of Science of Philadelphia before another year, which will be a very valuable addition to the Library.

The new shelving, for which my predecessors worked so earnestly, was placed in the Library one year ago, and has greatly improved the facilities for placing and caring for the books and increased the facility of access. The United States Government publications have all been catalogued so that they are much more accessible. A cordial, earnest spirit of helpfulness has been extended to all departments of the Library and to all parts of the State wherever calls have been made (which have been very frequent). From the number of calls from different colleges and clubs, Indiana would improve a system of traveling libraries which have been introduced into other States, whereby any literary body could enjoy, for a limited time, some of the rich stores gathered in the State Library.

It is pleasant to state that the number of persons consulting the Library is constantly increasing, and the number will continue, doubtless, when the general public come to realize what a privilege is theirs. It affords me pleasure to acknowledge the co-operation and hearty support of the State Library Board and the faithful and earnest efforts of those associated with me in the Library.

Respectfully submitted,

EMMA L. DAVIDSON.

*To the General Assembly:*

The State Board of Education, upon which was devolved the duties of a State Library Board by the last General Assembly, begs to submit the following:

The origin and history of the Library show that it has a double function. It is first a repository of certain books and papers of the State Government, and, secondly, it is a Library of reference for members of the General Assembly and the public.

However important this first function may have been in the early history of the State, it no longer constitutes any important part of the duties of the Library or the Librarian.

Your Library Board has, in consideration of the meagerness of the appropriations and the laws forbidding circulation to the volumes, directed the expenditure for books along the lines of history and political economy, preferring to collect consistent lines of works of standard authors fitted to the especial needs of the limited patronage rather than dissipate a small revenue over the wide fields of science, art and general literature.

Some plans for increasing the popularity and efficiency of this department of the State's service have been suggested by our two years of management of the Library.

We shall submit to the 60th General Assembly a proposed bill containing our recommendations for which we bespeak your careful consideration.

*President State Board of Education.*

*Secretary of State Board of Education.*
